## **RESTRICTION**

### ***Response to Amendment***

1. This action is responsive to the Amendment filed on 12 June 2006. Claims 7-12, 26-28, and 32-34 have been cancelled. Claims 1-6, 13-25 and 29-31 are pending in the application.

### ***Election/Restrictions***

2. This application contains claims directed to the following patentably distinct species:

I. Figures 1-5                      A hermetic package having a feed through with solder inside of the feed through for the optical fiber.

II. Figures 6A-7D                A hermetic package having a semi-cylindrical snout, a furcation tube on the optical fiber, a coupling tube around the cylindrical snout and the furcation tube, and an epoxy to seal an area inside the coupling tube.

3. The species are independent or distinct because Species I and Species II appear to be related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product, and the species are patentably distinct (MPEP §

Art Unit: 2874

806.05(j)). In the instant case, the intermediate product is deemed to be useful as an optical module and the inventions are deemed patentably distinct because there is nothing on this record to show them to be obvious variants.

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
